

LINKBOOK

AN OPERATOR'S COCKPIT, FOR STUDIOS THAT DON'T HAVE AN OPERATOR.

The quiet ops layer for small studios.

*QuickBooks, Harvest, Dropbox Sign, Airtable and Gmail — read into one ranked inbox.
Linkbook proposes the next move; you approve it in one click.*

Built for
1–10 person creative studios
Pattern
Human-in-the-loop, agent-driven
Status
Working prototype, live integrations
Date
April 2026

// CONCIERGE FOR THE STUDIO THAT RUNS ITSELF

A 5-person studio runs on *seven browser tabs* and one tired founder.

Small creative studios — design, editorial, branding, content — live inside QuickBooks, Harvest, Dropbox Sign, Airtable, and Gmail. None of these tools talk to each other. So the founder does.

-
- ♦ **Contracts get signed in Dropbox Sign** — but the project never lands in Harvest, the client never lands in Airtable, the kickoff email never goes out.
 - ♦ **Invoices age in QuickBooks** — until someone notices, drafts a polite reminder, and sends it manually.
 - ♦ **Payments land unapplied** — and sit there, because matching them to invoices is "later this week."
 - ♦ **Time isn't logged** — until Friday at 6pm.
-

// THE GAP IS BETWEEN TOOLS, NOT INSIDE THEM

One ranked inbox. Agents propose. *You approve.*

Linkbook ingests events from all five tools, scores them, and surfaces only the ones that need a human. For each one, an agent drafts the concrete next action — and waits for one click.

01 / READ

Cross-tool inbox

QBO, Harvest, Sign, Airtable, Gmail — one ranked feed. No tab-switching.

02 / PROPOSE

Agent drafts the move

Specialized sub-agents per integration. Confidence-scored. Reads the context, drafts the action, surfaces it.

// AGENTS HANDLE THE TOIL. THE HUMAN KEEPS THE JUDGMENT.

No smoke. *Real OAuth, real Harvest project, real audit trail.*

Built *for the operator*, not for another company's backend.

REALISTIC TO ADOPT

Works on tools they already own.

QuickBooks, Harvest, Dropbox Sign, Airtable, Gmail. OAuth in once. No data migration. No re-platforming. No new system of record.

FAST TO PILOT

Single-tenant, single-user. Ship in days.

Real OAuth flows for each integration · per-source live/mock toggle · seedable demo data · audit trail and soft-undo from day one.

CALM BY DESIGN

HITL, not autopilot.

Confidence-scored proposals. Operator stays in the loop on every consequential action. Trust compounds; automation expands as it earns it.

Studios get a *silent* ops hire.

TIME RECLAIMED

4–8h

Per founder, per week.

Reminders, kickoffs, payment matching, time-entry chasing — no longer manual. That's a working day a week back.

REVENUE DEFENDED

Faster collection, fewer drops.

// THE STUDIO THAT RUNS ITSELF ISN'T AN AUTONOMOUS STUDIO. IT'S A CALMER ONE.

*Linkbook is the **silent operator** for studios that don't have one.*

QBO + Harvest + Sign + Airtable + Gmail, read into one ranked inbox.

Agents propose. You approve. The work gets done. Calm. Dense. Auditable.
